E-Prescribing

E-Prescribing is a federally mandated initiative that requires all physicians to prescribe electronically.

E-Prescribing software sends prescriptions over the internet to your pharmacy in a safe and secure way, through the same technology used by credit card companies. This helps protect the privacy of your personal information.

E-Prescribing software also lets your doctor see important information, like drug interactions and your prescription history. It also allows the doctor to prescribe medications that are covered by your insurance plan.

The benefit to you is:

- Increases the chance that you will pay the lowest possible co-pay for your medications
- Less confusion over handwritten prescriptions or unclear phone calls
- Reduced possibility of medical errors
- Less chance of adverse drug reactions
- Fewer trips to drop off your prescriptions at the pharmacy
- A safer, faster and easier way to get your prescriptions filled

Patient Consent

I agree that Friendly Urgent & Family Care may request and use my prescription medication history from other healthcare providers or third party pharmacies to benefit the patient for treatment purposes.
